N-Commissioning™

Ensure the Potential of Your New Facilities

Emerson's patented N-Commissioning™ service for new or remodeled facilities carefully inspects MEP, refrigeration, and building control systems to make sure they're ready for service. As you already know, maintenance costs are a continuous focus for operations. By ensuring your stores are constructed and operating as designed before your new facility opens, you can help avoid future costs and maintenance nightmares. N-Commissioning helps you identify construction issues to make swift, sound decisions and improvements prior to opening. As part of our N-Commissioning services, we provide you with complete program planning, implementation, technical teams, training, and management. In addition, we document our step-by-step procedures for your review.

N-Commissioning Benefits:

- Assuring your equipment purchases and construction contracts are providing full value
- Increasing energy efficiency and reducing energy expenses while ensuring equipment reliability
- Identifying problems before they are apparent such as incorrect roof penetrations, piping and wiring errors, and more
- Improving the store opening experience
- Improving product temperatures and reducing perishable shrink expense
- Return visit verifies that problems truly are solved

N-Commissioning™

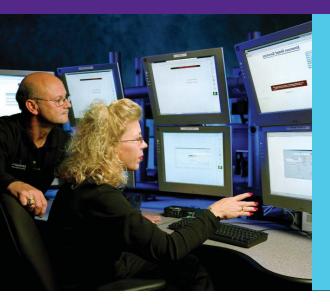

Your Data, Available Anytime

We'll keep you up to date with regular reports and complete work list items, so you can more accurately monitor your maintenance methods. All the information gathered at your facility is available to you in less than 48 hours on a secure web site designed exclusively for your use. These reports are used to pinpoint problems and help you direct your maintenance staff more efficiently. The result? You operations run more efficiently and consume less energy than ever--adding more profits to your bottom line.

Monitor Your Savings

Once your facility is open for business with optimal setpoints, regularly verifying that these setpoints are still being used helps safeguard your energy savings. With Emerson's Setpoint Verification Service, sold separately as part of the Intelligent Store™ Software Suite, we will regularly access your site and identify any setpoints that are no longer at their optimal value. This helps protect your hard-earned operational savings.

Intelligent Store™ Architecture

Emerson's N-Commissioning is a service component of Emerson's Intelligent Store™ architecture. The architecture creates an integrated suite of products and services that provide retail operators a new level of sophistication and insight into their operations. When integrated or linked together, these innovative products and services can provide maintenance, energy, and reliability gains. Also included in the Intelligent Store are the E2 Facility Management System, Control Link device controller, Intelligent Store Discus® compressor, select Lennox HVAC units, and other third party devices. For more information on Emerson's Intelligent Store, the Control Link platform, or facility monitoring and field services, visit www.EmersonClimate.com/retailers.htm
