

ProAct® Services

Alarm Management

ProAct® Alarm Management provides custom responses to building, refrigeration, HVAC and environmental alarm conditions, allowing retailers to focus more on the business of selling than on systems performance. By automating responses to facility alarm conditions, corrections can be made more quickly and histories are automatically generated by site, allowing you to easily identify problem stores for corrective actions.

As part of Alarm Management, the Resolution level of service is available. This may eliminate the need for up to 30% of service dispatches to a facility, lowering your maintenance costs dramatically. Retail Solutions is also capable of filtering non-critical alarms. By catching these alarms before they reach your service provider, expensive service calls for issues that you deem to be of minor importance are eliminated.

Benefits

- View and aggregate alarms across the chain for unsurpassed management of your enterprise
- Gain unique insight into performance issues at stores with higher alarm rates, which increases your energy usage
- Rest easy knowing a trained ProAct service technician is always ready, 24 hours per day, 7 days per week, 365 days per year
- Save money by reducing service dispatches up to 30% with Resolution level monitoring

ProAct® Alarm Management

Don't React, ProAct

Retail Solutions brings an unequalled blend of experience, technology and data analysis expertise to our comprehensive monitoring and facilities management services. It's a proven combination that cuts your energy and maintenance costs dramatically.

Our ProAct Service Center provides you with an enterprise view of your operations, making it easy to connect to and access vital information. We are trusted by more than 5,500 sites, 24 hours a day, everyday of the year, to make sure their facilities are consistently running at optimum levels. Don't react to problems, ProAct.

Intelligent Store™ Architecture

Emerson's ProAct Alarm Management is a service component of Emerson's Intelligent Store™ architecture. The architecture creates an integrated suite of products and services that provide retail operators a new level of sophistication and insight into their operations. When integrated or linked together, these innovative products and services can provide maintenance, energy, and reliability gains. Also included in the Intelligent Store are the E2 Facility Management System, Control Link® device controller, Intelligent Store Discus® compressor, select Lennox HVAC units, and other third party devices. For more information on Emerson's Intelligent Store, the Control Link platform, or facility monitoring and field services, please visit www.EmersonClimate.com/retailers.htm
